### Lecture 8
**Title:** “Finding the Needle in a Haystack: Chasing the Elusive Origin in Metastatic carcinoma of Unknown Primary”

**Speaker:** Yvonne G. Dowdy, M.D., Medical Director; KHN Hematology, Molecular & Flow Cytometry Laboratories Medical Director: Kettering and Soin Cancer Center LabCorp Laboratories

This presentation will review different cancer types found in unknown primary patients and discuss the expanded use of immunohistochemistry to identify the tissue of origin.

**ASCP CMLE Credit:** 1 CMLE Limited to 40

### Lecture 9
**Title:** Decalcification and the Solutions

**Speaker:** Diane L. Sterchi MS, HT(ASCP)

It is really beneficial for the histotechnologist to know what is in your routine decal solution. Exploring the decal solutions and what chemicals are in them. Acting smart on determining the end point of decalcification easily without destroying the tissue.

**ASCP CMLE Credit:** 1 CMLE Limited to 40

### Lecture 10
**Title:** “Not Just Skin Deep: Histologic Considerations of Cutaneous Specimens”

**Speaker:** Catherine Chung, MD, Assistant Clinical Professor of Pathology and Medicine, The Ohio State University Wexner Medical Center and Staff Pathologist at Nationwide Children's Hospital.

This talk will address special considerations when preparing skin biopsies and excisions such as inflammatory versus neoplastic lesions, melanocytic versus non-melanocytic tumors, and alopecia protocols. Special sections such as en face sections for “Slow Moths” procedures in diagnosis of residu- mal melanoma will also be discussed. Lastly, there will be discussion on approaches to the role immunohistochemistry plays in common skin diagnoses.

**ASCP CMLE Credit:** 1 CMLE Limited to 40

### Lecture 11
**Title:** “Pathology Reporting, Recut: Melting It Down and Embedding Some Examples”

**Speaker:** Alexander D Fitzthum, MD, Hematopathology Fellow, The Ohio State University Wexner Medical Center

Highlighting the terms used by pathologists in their reports, with an empha- sis on morphologic terms, synoptic reporting, and adequacy. Examples with histologic images will be used throughout.

**ASCP CMLE Credit:** 1 CMLE Limited to 40

### Lecture 12
**Title:** “Neoplasms of Exocrine and Endocrine Pancreas”

**Speaker:** Wei Chen, M.D., Ph.D., Associate Director, Liver Pathology, Associate director, GI/Liver Pathology Fellowship, Department of Pathology

Pancreatic cancer is the 4th mostly deadly cancer in the USA, with a five year survival rate of 9%. This presentation will review different cancer types from exocrine and endocrine pancreas, focusing on their diverse histologic and immunohistochemical features. New developments in molecular pathol- ogy and clinical treatment will also be briefly discussed.

**ASCP CMLE Credit:** 1 CMLE Limited to 40

**Vendor Break** 10:15 – 11:00 am

---

### Lecture 13
**Title:** “Intraoperative Frozen Section Consultation – Technical Aspects, Clinical Applications and Diagnostic Limitations”

**Speaker:** Johanna Savage, M.D., Assistant Professor of Pathology, Department of Pathology, The Ohio State University Wexner Medical Center

Frozen section consultations represent a unique aspect of pathology. This presentation will discuss some of the technical and professional aspects of frozen section pathology, its clinical applications and its diagnostic limita-

**ASCP CMLE Credit:** 1 CMLE Limited to 40

---

### Lecture 14
**Title:** “What Happens to FFPE slides in a Molecular Lab?”

**Speaker:** Huolin Tu, Ph.D., MB(ASCP), James Molecular Lab, The Ohio State University Medical Center

FFPE slides, prepared in a histology lab, are the major starting materials used in a molecular lab. In James Molecular Lab, we perform a variety of molecular testing on FFPE slide through different molecular technological platforms such as FISH (fluorescence in situ hybridization), Sanger sequenc-

### Lunch Buffet and Membership Meeting
**Time:** 12:00-1:00 pm

---

### Lecture Series 15
**Title:** “What Should I Eat? A Brief Overview of Current Trends in Nutrition”

**Speaker:** Liz Whitaker, RD, LD Clinical Dietitian at Univ. Cincinnati, Drake Center

From cleansing to Whole30 and every diet in between, it is unsurprising many of us feel overwhelmed about what to eat. In this talk, a registered dietitian speaks about the key points of current diet trends - the good, the bad and the potentially harmful among popular diets and nutrition supple-

1.5 CELE

“Wound Care in the 21st Century”

Dr. Kathleen M. Graytrock, DPM, CWSP, FACCWS, FAPWC, AAWC, Berry Leaf Foot and Ankle Center, Ltd., Columbus and Mansfield, OH

There are over 3,000 wound care products on the market today. How do we decide what to use and when to use it? It’s not as easy as it sounds. How Comorbid conditions play a vital role.
